Sciences, Oulu**
May 2024

THAHER AL AMIR

PROFESSIONAL SUMMARY

Software Developer with 5 years of developing experience gaining a wide range of past projects in various programming languages. Adept in designing and implementing web solutions with a passion for front-end aesthetics and problem-solving. A collaborative team player, eager to learn from experts and contribute to innovative projects. Outside of coding, I enjoy video editing and snowboarding.

CERTIFICATIONS

- **Front-End Developer Certificate, Meta**
- **Full Stack Developer, Integriify**

PROFESSIONAL EXPERIENCE

May 2024 - Current

Oulun Yliopisto - Software Designer, Remote

Designing a portal to help scientists network with one another. The platform is being developed using WordPress and JavaScript. As the only software engineer in the team, I handle most of the technical responsibilities, ensuring smooth progress and development.

January 2022 - December 2022

Integriify - Full Stack Developer Trainee

- Enhanced user experience by developing responsive front-end designs using HTML, CSS, and JavaScript.
- Implemented version control systems such as Git for better tracking, organization, and collaboration on code changes.

August 2021 - December 2022

TrainersHouse - Marketeer, Oulu, Finland

- Experience in B2B cold contacts.
- Skilled at working independently and collaboratively in a team environment.
- Excellent communication skills, both verbal and written.
- Used critical thinking to break down problems, evaluate solutions and make decisions.

January 2018 - June 2018

Finnish Defence Forces - Conscript Soldier, Santahamina

January 2015 - April 2018

Suomen Palloliitto - Referee, Oulu

- Enhanced game fairness by enforcing rules and regulations during various sports events.
- Promoted player safety by monitoring games for potential hazards and injuries.
- Collaborated with other referees to ensure consistent application of rules across all games.
- Reduced disputes by making accurate and timely calls on plays and penalties.

RECENT PROJECTS

Lumityö-App

React Native, JavaScript, Figma Design, Expo Go

This app was done for my friends business needs. Developed a visually engaging React Native mobile application for ordering snow removal services. The app provides users with an intuitive interface to select services, input contact details, and confirm orders. Leveraging Figma for design, the application offers an enhanced user experience. Implemented a secure backend integration, enabling order confirmation emails via EmailJS. This project showcases my skills in mobile app development, UI/UX design, and server-side communication, highlighting a seamless and user-friendly solution for snow removal service requests.

Logistics Platform

Next.js, JavaScript, Wordpress

Next.js application designed for managing and filtering shipment records sourced from a WordPress backend. This application allows users to create, view, filter & fetch detailed information about available deliveries and purchase them.
